

National Severe Weather Warning Service

Chief Forecasters Assessment

An active frontal system is expected to move northwards during Wednesday afternoon, with rain across eastern Scotland gradually turning heavier and more persistent during Wednesday evening. The frontal system is expected to become slow-moving with rain persisting well into Friday. On high ground, mainly above 700 metres, snow is expected and some significant accumulations are likely.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **15:00 on Wed, 25th Apr 2012** until **23:59 on Wed, 25th Apr 2012**

Outbreaks of rain will become persistent and at times heavy during Wednesday afternoon and evening across Angus and Aberdeenshire, especially over higher ground. Accumulations of 15-25 mm are expected with hilly areas inland perhaps receiving local accumulations of 35 mm by midnight. On higher hills and mountains, significant falls of snow will occur. The public should be aware of the risk of standing water and spray on the roads and perhaps some localised flooding.
